AI aanbevelingen

NAME: AI aanbevelingen

DATE: July 4, 2025 12:20 PM

DESCRIPTION OF TECHNOLOGY

Met AI wordt ervoor gezorgd dat je verbeterde aanbevelingen krijgt op je Netflix-account, die nauwkeurig aansluiten bij wat jij leuk vindt.

IMPACT ON SOCIETY

Op Netflix krijg je veel content aanbevolen. Alle films en series worden in verschillende lijstjes gezet. Door de vele content die aan je wordt aanbevolen, wordt het moeilijker om een keuze te maken welke film of serie je wilt kijken. Er wordt niet kwalitatief en selectief content aan jou aanbevolen. Met AI kan het kijkgedrag van gebruikers heel goed worden geanalyseerd om zo de best mogelijke content aan jou aan te bevelen.

HUMAN VALUES

Door alle gegevens creëert AI een persona op basis van jouw kijkgedrag. Dit zou geen invloed moeten hebben op jouw identiteit, maar wel op de voorkeuren in films en series die je wellicht leuk gaat vinden. Dit doet de technologie puur op basis van geanalyseerde gegevens van jouw kijkgedrag. Dit kan er echter toe leiden dat je gedrag verandert, bijvoorbeeld als je bij een film te vaak op de 10-secondenknoop drukt.

TRANSPARENCY

HATEFUL AND CRIMINAL ACTORS

Doordat AI jouw kijkgedrag goed kan volgen en analyseren, kan dit leiden tot schending van de privacy. Het kan zo zijn dat de AI ook buiten Netflix jouw kijkgedrag volgt.

DATA

FUTURE

PRIVACY

Doordat AI jouw kijkgedrag volgt en analyseert op Netflix, verzamelt het gegevens om een persona op te bouwen. Met de persona weet AI welke films en series het jou kan aanbevelen. Zo kan de technologie kwalitatieve en selectieve content aanbevelen.

INCLUSIVITY

DESCRIPTION OF TECHNOLOGY

Met AI wordt ervoor gezorgd dat je verbeterde aanbevelingen krijgt op je Netflix-account, die nauwkeurig aansluiten bij wat jij leuk vindt.

IMPACT ON SOCIETY

What is exactly the problem? Is it really a problem? Are you sure?

Can you exactly define what the challenge is? What problem (what 'pain') does this technology want to solve? Can you make a clear definition of the problem? What 'pain' does this technology want to ease? Whose pain? Is it really a problem? For who? Will solving the problem make the world better? Are you sure? The problem definition will help you to determine...

HATEFUL AND CRIMINAL ACTORS

In which way can the technology be used to break the law or avoid the consequences of breaking the law?

Can you imagine ways that the technology can or will be used to break the law? Think about invading someone's privacy. Spying. Hurting people. Harassment. Steal things. Fraud/identity theft and so on. Or will people use the technology to avoid facing the consequences of breaking the law (using trackers to evade speed radars or using bitcoins to launder...)

PRIVACY

Does the technology register personal data? If yes, what personal data?

If this technology registers personal data you have to be aware of privacy legislation and the concept of privacy. Think hard about this question. Remember: personal data can be interpreted in a broad way. Maybe this technology does not collect personal data, but can be used to assemble personal data. If the technology collects special personal data (like...

HUMAN VALUES

How is the identity of the (intended) users affected by the technology?

To help you answer this question think about sub questions like:

- If two friends use your product, how could it enhance or detract from their relationship?
- Does your product create new ways for people to interact?...

TRANSPARENCY

Is it explained to the users/stakeholders how the technology works and how the business model works?

- Is it easy for users to find out how the technology works?
- Can a user understand or find out why your technology behaves in a certain way?
- Are the goals explained?
- Is the idea of the technology explained?
- Is the technology company transparent about the way their...

STAKEHOLDERS

Who are the main users/targetgroups/stakeholders for this technology? Think about the intended context by...

When thinking about the stakeholders, the most obvious one are of course the intended users, so start there. Next, list the stakeholders that are directly affected. Listing the users and directly affected stakeholders also gives an impression of the intended context of the technology.

...

SUSTAINABILITY

In what way is the direct and indirect energy use of this technology taken into account?

One of the most prominent impacts on sustainability is energy efficiency. Consider what service you want this technology to provide and how this could be achieved with a minimal use of energy. Are improvements possible?

DATA

Are you familiar with the fundamental shortcomings and pitfalls of data and do you take this sufficiently into...

There are fundamental issues with data. For example:

- Data is always subjective;
- Data collections are never complete;
- Correlation and causation are tricky concepts;
- Data collections are often biased;...

FUTURE

What could possibly happen with this technology in the future?

Discuss this quickly and note your first thoughts here. Think about what happens when 100 million people use your product. How could communities, habits and norms change?

INCLUSIVITY

Does this technology have a built-in bias?

Do a brainstorm. Can you find a built-in bias in this technology? Maybe because of the way the data was collected, either by personal bias, historical bias, political bias or a lack of diversity in the people responsible for the design of the technology? How do you know this is not the case? Be critical. Be aware of your own biases....
