QUICKSCAN - CANVAS - HELPSIDE

	HUMAN VALUES	TRANSPARENCY
DATE: September 5, 2024 5:34 AM DESCRIPTION OF TECHNOLOGY ATM	How is the identity of the (intended) users affected by the technology?	Is it explained to the users/stakeholders how the technology works and how the business model works?
	To help you answer this question think about sub questions like:	 Is it easy for users to find out how the technology works? Can a user understand or find out why your technology behaves in a certain way?
	- If two friends use your product, how could it enhance or detract from their relationship?	Are the goals explained?Is the idea of the technology explained?
	- Does your product create new ways for people to interact?	- Is the technology company transparent about the way their
IMPACT ON SOCIETY	STAKEHOLDERS	SUSTAINABILITY
What is exactly the problem? Is it really a problem? Are you sure?	Who are the main users/targetgroups/stakeholders for this technology? Think about the intended context by	In what way is the direct and indirect energy use of this technology taken into account?
Can you exactly define what the challenge is? What problem (what 'pain') does this technology want to solve? Can you make a clear definition of the problem? What 'pain' does this technology want to ease? Whose pain? Is it really a problem? For who? Will solving the problem make the world better? Are you sure? The problem definition will help you to determine	When thinking about the stakeholders, the most obvious one are of course the intended users, so start there. Next, list the stakeholders that are directly affected. Listing the users and directly affected stakeholders also gives an impression of the intended context of the technology.	One of the most prominent impacts on sustainability is energy efficiency. Consider what service you want this technology to provide and how this could be achieved with a minimal use of energy. Are improvements possible?
HATEFUL AND CRIMINAL ACTORS In which way can the technology be used to break the	DATA Are you familiar with the fundamental shortcomings and	FUTURE What could possibly happen with this technology in the
law or avoid the consequences of breaking the law?	pitfalls of data and do you take this sufficiently into	future?
Can you imagine ways that the technology can or will be used to break the law? Think about invading someone's privacy.	There are fundamental issues with data. For example:	Discuss this quickly and note your first thoughts here. Think about what happens when 100 million people use your
Spying. Hurting people. Harassment. Steal things. Fraud/ identity theft and so on. Or will people use the technology to	Data is always subjective;Data collections are never complete;	product. How could communities, habits and norms change?
avoid facing the consequences of breaking the law (using trackers to evade speed radars or using bitcoins to launder	Correlation and causation are tricky concepts;Data collections are often biased;
