

GEA - ML

This project aims to automate the GEA (Generic Enterprise Architecture) framework using AI and Natural Language Processing by analysing strategic documents. Wanting to identify and extract statements from the documents such as the mission, vision, core values, goals, and strategy. We want the model to understand relationships between the different entities to connect these statements and eventually automate the rating system.

Technology Impact Cycle Tool

GEA - ML

Impact on society

What impact is expected from your technology?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Hateful and criminal actors

What can bad actors do with your technology?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Privacy

Are you considering the privacy & personal data of the users of your technology?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Human values

How does the technology affect your human values?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Stakeholders

Have you considered all stakeholders?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Data

Is data in your technology properly used?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Inclusivity

Is your technology fair for everyone?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Transparency

Are you transparent about how your technology works?

This category has not been filled yet.

Technology Impact Cycle Tool

GEA - ML

Sustainability

Is your technology environmentally sustainable?

This category has not been filled yet.
