Impact on society

What impact is expected from your technology?

This category is only partial filled.

What is exactly the problem? Is it really a problem? Are you sure?

We are creating a package marketplace where people could share and discover new packages for their own businesses. This is not a problem to be fixed in this solution, but rather makes it easier for both package content creators and users.

Are you sure that this technology is solving the RIGHT problem?

-

How is this technology going to solve the problem?

This question has not been answered yet.

What negative effects do you expect from this technology?

The only possible negative effects this may have, is that the content creators create packages that lead to possible malicious content. The reason we are only talking about content creators is that it is the only way possible a normal user can share their content to the community.

In what way is this technology contributing to a world you want to live in?

This will create a community where people share their content for other people to use. At the beginning it would not be as filled in with content, for basically most starter softwares, there will still be packages for users and a platform to start sharing. But eventually on the long term I think with the possible growing community, there will be alot of content to discover and use.

Now that you have thought hard about the impact of this technology on society (by filling out the questions above), what improvements would you like to make to the technology? List them below.

- it would be nice to have an bigger aspect of the software to normal users feedback. A place where they can talk about their own experience and benefits with the package they used.

Hateful and criminal actors

What can bad actors do with your technology?

This category is only partial filled.

In which way can the technology be used to break the law or avoid the consequences of breaking the law?

The only way a possible harm can be done to the users, is if the the content creator was able to advertise a package of some sort that enables people to download content they are not aware of, for example, a possible malware.

Can fakers, thieves or scammers abuse the technology?

There is a possibility as mentioned above, where people will use it for the wrong reasons.

Can the technology be used against certain (ethnic) groups or (social) classes?

No, we do not think people could use this application against a specific group of people.

In which way can bad actors use this technology to pit certain groups against each other? These groups can be, but are not constrained to, ethnic, social, political or religious groups.

This question has not been answered yet.

How could bad actors use this technology to subvert or attack the truth?

This question has not been answered yet.

Now that you have thought hard about how bad actors can impact this technology, what improvements would you like to make? List them below.

This question has not been answered yet.

Privacy

Are you considering the privacy & personal data of the users of your technology?

This category is only partial filled.

Does the technology register personal data? If yes, what personal data?

For both users and content creators, their email will be saved and possibly their full name.

Do you think the technology invades the privacy of the stakeholders? If yes, in what way?

This question has not been answered yet.

Is the technology is compliant with prevailing privacy and data protection law? Can you indicate why?

This question has not been answered yet.

Does the technology mitigate privacy and data protection risks/ concerns (privacy by design)? Please indicate how.

This question has not been answered yet.

In which way can you imagine a future impact of the collection of personal data?

This question has not been answered yet.

Now that you have thought hard about privacy and data protection, what improvements would you like to make? List them below.

This question has not been answered yet.

Transparency

Are you transparent about how your technology works?

This category is only partial filled.

Is it explained to the users/stakeholders how the technology works and how the business model works?

When rendering the URL, the first page a new user will see is the homepage. Where all the information related to the purpose and content of the website is in.

If the technology makes an (algorithmic) decision, is it explained to the users/stakeholders how the decision was reached?

This question has not been answered yet.

Is it possible to file a complaint or ask questions/get answers about this technology?

This question has not been answered yet.

Is the technology (company) clear about possible negative consequences or shortcomings of the technology?

This question has not been answered yet.

Now that you have thought hard about the transparency of this technology, what improvements would you like to make? List them below.

This question has not been answered yet.

Sustainability

Is your technology environmentally sustainable?

This category is only partial filled.

In what way is the direct and indirect energy use of this technology taken into account?

with our current purpose and ideology for the project, we do not think there is a way where we have an impact on the energy sustainability.

Do you think alternative materials could have been considered in the technology?

This question has not been answered yet.

Do you think the lifespan of the technology is realistic?

This question has not been answered yet.

What is the hidden impact of the technology in the whole chain?

This question has not been answered yet.

Now that you have thought hard about the sustainability of this technology, what improvements would you like to make? List them below.

This question has not been answered yet.

Future

Did you consider future impact?

This category is only partial filled.

What could possibly happen with this technology in the future?

We believe that in the future it is possible for the website to gain a reputation as a fast package marketplace. If things go well , we will have thousands of packages and solutions for all types of businesses across the globe.

Sketch a or some future scenario (s) (20-50 years up front) regarding the technology with the help of storytelling. Start with at least one utopian scenario.

This question has not been answered yet.

Sketch a or some future scenario (s) (20-50 years up front) regarding the technology with the help of storytelling. Start with at least one dystopian scenario.

This question has not been answered yet.

Would you like to live in one of this scenario's? Why? Why not?

This question has not been answered yet.

What happens if the technology (which you have thought of as ethically well-considered) is bought or taken over by another party?

This question has not been answered yet.

Impact Improvement: Now that you have thought hard about the future impact of the technology, what improvements would you like to make? List them below.
