Impact on society
What impact is expected from your technology?

Hateful and criminal actors
What can bad actors do with your technology?

ict

#### **Privacy**

Are you considering the privacy & personal data of the users of your technology?

ict

#### **Human values**

How does the technology affect your human values?

ict

#### **Stakeholders**

Have you considered all stakeholders?

ict

#### **Data**

Is data in your technology properly used?

ict

#### Inclusivity

Is your technology fair for everyone?

Will everyone have access to the technology?

no, because the application is only beneficial for the company

**Does this technology have a built-in bias?** no,

#### Does this technology make automatic decisions and how do you account for them?

our current technology is not going to be automatic since the user can assign and reserve a spot themselves, if we do the Schedule for work then yes we do automatic scheduling but it is not based because the application doesn't look directly at a person but more towards the rules that set when they can work and going to be standard procedures

### Is everyone benefitting from the technology or only a a small group? Do you see this as a problem? Why/why not?

yes only the company can make use of it and the problem is only that other people or businesses that also want such a technology needs to find out it is possible so they can also use it

### Does the team that creates the technology represent the diversity of our society?

yes, our team members have different cultures as.

Now that you have thought hard about the inclusivity of the technology, what improvements would you like to make? List them below.

the improvement is to make the technology global so it can reach more parts of the companys

**Transparency**Are you transparent about how your technology works?

**Sustainability** Is your technology environmentally sustainable?

ict

#### **Future**

Did you consider future impact?
