NAME: Fake News Application	HUMAN VALUES	TRANSPARENCY
DATE: July 14, 2025 9:50 PM DESCRIPTION OF TECHNOLOGY Crowd Sourced Database of Articles containing Fake News	How is the identity of the (intended) users affected by the technology?	Is it explained to the users/stakeholders how the technology works and how the business model works?
	To help you answer this question think about sub questions like:	 Is it easy for users to find out how the technology works? Can a user understand or find out why your technology
	- If two friends use your product, how could it enhance or	behaves in a certain way? - Are the goals explained?
	detract from their relationship?Does your product create new ways for people to interact?	Is the idea of the technology explained?Is the technology company transparent about the way their
IMPACT ON SOCIETY	STAKEHOLDERS	
What is exactly the problem? Is it really a problem? Are you sure?	Who are the main users/targetgroups/stakeholders for this technology? Think about the intended context by	In what way is the direct and indirect energy use of this technology taken into account?
Can you exactly define what the challenge is? What problem (what 'pain') does this technology want to solve? Can you make a clear definition of the problem? What 'pain' does this technology want to ease? Whose pain? Is it really a problem? For who? Will solving the problem make the world better? Are you sure? The problem definition will help you to determine	When thinking about the stakeholders, the most obvious one are of course the intended users, so start there. Next, list the stakeholders that are directly affected. Listing the users and directly affected stakeholders also gives an impression of the intended context of the technology.	One of the most prominent impacts on sustainability is energy efficiency. Consider what service you want this technology to provide and how this could be achieved with a minimal use of energy. Are improvements possible?
HATEFUL AND CRIMINAL ACTORS	DATA	FUTURE
In which way can the technology be used to break the law or avoid the consequences of breaking the law?	Are you familiar with the fundamental shortcomings and pitfalls of data and do you take this sufficiently into	What could possibly happen with this technology in the future?
Can you imagine ways that the technology can or will be used to break the law? Think about invading someone's privacy.	There are fundamental issues with data. For example:	Discuss this quickly and note your first thoughts here. Think about what happens when 100 million people use your
Spying. Hurting people. Harassment. Steal things. Fraud/ identity theft and so on. Or will people use the technology to	 Data is always subjective; Data collections are never complete; 	product. How could communities, habits and norms change?
avoid facing the consequences of breaking the law (using trackers to evade speed radars or using bitcoins to launder	 Correlation and causation are tricky concepts; Data collections are often biased; 	
PRIVACY	INCLUSIVITY	FIND US ON <u>WWW.TICT.IO</u>
Does the technology register personal data? If yes, what personal data?	Does this technology have a built-in bias?	THIS CANVAS IS PART OF THE TECHNOLOGY IMPACT CYCLE TOOL. THIS CANVAS IS THE RESULT OF A
If this technology registers personal data you have to be aware of privacy legislation and the concept of privacy. Think hard about this question. Remember: personal data can be	Do a brainstorm. Can you find a built-in bias in this technology? Maybe because of the way the data was collected, either by personal bias, historical bias, political	QUICKSCAN.
