Realistic Expectations:

The technology presents a practical solution to the common issue of recipe loss and forgetfulness. By providing an accessible platform for users to save and share recipes, it aims to streamline the process of finding, storing, and recreating favorite dishes. Realistic expectations include enhanced organization for users' culinary endeavors, improved accessibility to a wide range of recipes, and the convenience of streamlined grocery shopping through suggested product lists.

Problem Solving:

The main issue this technology addresses is the inconvenience and frustration that comes with losing or forgetting recipes. For many individuals, particularly avid home cooks and food enthusiasts, recipes are valuable assets that they want to preserve and share. This web application streamlines this process by providing a centralized hub where users can easily input, store, and retrieve

their recipes. Additionally, the feature that suggests exact products needed from the store complements the recipe-saving aspect by simplifying the shopping experience. This technology essentially bridges the gap between finding a recipe and making it a reality in the kitchen.

Solution Process:

Upon logging into the web application, users are greeted with a user-friendly interface designed for effortless recipe management. The process of saving a recipe involves a few simple steps:
