## Impact on society

What impact is expected from your technology?

### **What is exactly the problem? Is it really a problem? Are you sure?**

There is currently no easily accessible deck/collection creation and management tool, similar to archidekt for magic the gathering, available for the Hololive OCG

### **Are you sure that this technology is solving the RIGHT problem?**

There are already similar tools for other trading card games that are regularly used, and have active communities around them.

### **How is this technology going to solve the problem?**

By creating a tool for the creation, management and sharing of decks for the Hololive OCG, more people could more easily create their own decks, and share their ideas with others, possibly involving more people to the game.

### **What negative effects do you expect from this technology?**

If implemented incorrectly, data breaches can occur.

### **In what way is this technology contributing to a world you want to live in?**

While this technology doesn't effect the daily lives of people, it does effect how people might interact with the hobby. I care deeply about the hobby I am making this for, so I would like this technology to make it easier for others to get into the hobby.

### **Now that you have thought hard about the impact of this technology on society (by filling out the questions above), what improvements would you like to make to the technology? List them below.**

security,  
community pages, such as forums or discussion boards.

## Hateful and criminal actors

What can bad actors do with your technology?

### In which way can the technology be used to break the law or avoid the consequences of breaking the law?

If leaked, users email addresses and IP addresses can be used for fraud, stalking, etc

### Can fakers, thieves or scammers abuse the technology?

Attackers can abuse the technology to possibly gain access to users email addresses.

### Can the technology be used against certain (ethnic) groups or (social) classes?

No

### In which way can bad actors use this technology to pit certain groups against each other? These groups can be, but are not constrained to, ethnic, social, political or religious groups.

There is currently no way for the technology to pit groups against each other.

### How could bad actors use this technology to subvert or attack the truth?

No way.

### Now that you have thought hard about how bad actors can impact this technology, what improvements would you like to make? List them below.

Switch from HTTP to HTTPS,  
Validate, and sanitize all user inputs,  
Improve minimum password requirement,  
Implement multi-factor authentication,  
Implement audit logging and early warnings.

## Privacy

Are you considering the privacy & personal data of the users of your technology?

### Does the technology register personal data? If yes, what personal data?

The application stores a users email address.

### Do you think the technology invades the privacy of the stakeholders? If yes, in what way?

The technology does invade the privacy of stakeholders in small way by collecting and storing their provided email addresses.

### Is the technology is compliant with prevailing privacy and data protection law? Can you indicate why?

The technology is currently not compliant with privacy and data protection law, as there is no audit logging which is required, account deletion is not fully implemented, and overall security is not implemented well enough.

### Does the technology mitigate privacy and data protection risks/concerns (privacy by design)? Please indicate how.

The technology does mitigate privacy and data protection risks as much as possible by only collecting and storing what is absolutely necessary.

### In which way can you imagine a future impact of the collection of personal data?

Only if breached do I image that the collection of personal data will have an impact, as there is no other use for it.

### Now that you have thought hard about privacy and data protection, what improvements would you like to make? List them below.

Switch from HTTP to HTTPS,  
Validate, and sanitize all user inputs,  
Improve minimum password requirement,  
Implement multi-factor authentication,  
Implement audit logging and early warnings.

---

## Stakeholders

Have you considered all stakeholders?

**Who are the main users/targetgroups/stakeholders for this technology? Think about the intended context by answering these questions.**

**Name of the stakeholder**

Target users

**How is this stakeholder affected?**

Target users get an accessible tool to create and manage decks

**Did you consult the stakeholder?**

No

**Are you going to take this stakeholder into account?**

Yes

**Did you consider all stakeholders, even the ones that might not be a user or target group, but still might be of interest?**

**Name of the stakeholder**

Unknown

**How is this stakeholder affected?**

Cover-Corp is the owner of the Hololive Official Card Game IP, and holds the rights to images and cards used in the technology

**Did you consult the stakeholder?**

No

**Are you going to take this stakeholder into account?**

Yes

**Now that you have thought hard about all stakeholders, what improvements would you like to make? List them below.**

Implement an about section that informs users that all cards and images used by the technology is owned by cover-corp and add links to their official website

---

## Inclusivity

Is your technology fair for everyone?

**Will everyone have access to the technology?**

Yes

**Does this technology have a built-in bias?**

There's a built-in bias in the UX for users that are familiar to trading card games.

**Does this technology make automatic decisions and how do you account for them?**

There are currently no automatic decisions

**Is everyone benefitting from the technology or only a a small group? Do you see this as a problem? Why/why not?**

Everyone who uses the technology can benefit in the same way.

**Does the team that creates the technology represent the diversity of our society?**

No

**Now that you have thought hard about the inclusivity of the technology, what improvements would you like to make? List them below.**

## Transparency

Are you transparent about how your technology works?

**Is it explained to the users/stakeholders how the technology works and how the business model works?**

No

**If the technology makes an (algorithmic) decision, is it explained to the users/stakeholders how the decision was reached?**

No

**Is it possible to file a complaint or ask questions/get answers about this technology?**

No

**Is the technology (company) clear about possible negative consequences or shortcomings of the technology?**

No

**Now that you have thought hard about the transparency of this technology, what improvements would you like to make? List them below.**

Implement better UX,

Implement options for users to submit complaints, changes, etc.

Implement sections detailing what and how user data is collected and handled
