

**NAME:** AI pallet sorting  
**DATE:** June 4, 2025 9:51 AM  
**DESCRIPTION OF TECHNOLOGY**  
Using an automated software that can sort based on image the different standards of europallets.

**HUMAN VALUES**  
Make it easy to use.

**TRANSPARENCY**  
Make the product be simple to grasp and also use with a short and not steep learning curve.

**IMPACT ON SOCIETY**  
Long term the solution can be streamlined to be easier to deploy at scale. For instance using the first sites where it's deployed to gather enough labeled images for a dataset to train an AI model to do the recognition.

**STAKEHOLDERS**  
A way to calibrate or validate the tool would be interesting. Also role management shouldn't be too hard.

**SUSTAINABILITY**  
Make sure that future versions of the solution is compatible with the system in place to assure improvements.

**HATEFUL AND CRIMINAL ACTORS**  
Store as little data as possible while not hindering the running.

**DATA**  
being aware and very precise in what data is store, where, how and for how long. To avoid extensive data breaches.

**FUTURE**  
Make sure that no data that might be useless at the moment of launch but potentially harmful in the wrong hands gets stored long term.

**PRIVACY**  
Store as little data as possible to limit costs but also risks of that data being stolen.

**INCLUSIVITY**  
Give it a more generic name? as europallets sounds like an euro centric name?

**DESCRIPTION OF TECHNOLOGY**  
Using an automated software that can sort based on image the different standards of europallets.

**IMPACT ON SOCIETY**

**Now that you have thought hard about the impact of this technology on society (by filling out the questions...**

If you think about the real problem this technology is going to solve. If you think about the ability of this technology to solve the real problem. If you think about possible negative effects and whether this technology will contribute to a world you want to live in. If you think about all that, what improvements would you make? In technology? In context? In use?...

**HATEFUL AND CRIMINAL ACTORS**

**Now that you have thought hard about how bad actors can impact this technology, what improvements would...**

If you think about this technology being used to break the law, or avoid the consequences of breaking the law, or to be used against certain groups, or to attack the truth or to pit certain groups against each other. If you think about all of that, what improvements would you (want to) make? In the technology? In context? In use?...

**PRIVACY**

**Now that you have thought hard about privacy and data protection, what improvements would you like to make?...**

If you think about this technology invading someone's privacy or collecting personal data and if you think about the way this technology is compliant with prevailing law and mitigates dataprotection risks and concerns. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**HUMAN VALUES**

**Now that you have thought hard about the impact of your technology on human values, what improvements...**

If you think about the impact of this technology on human values and needs. If you think about how this technology affects the identity of the user, the autonomy of the user (can the users make their own decisions?) and the health and well-being of the user. If you think about all that, what improvement would you (want to) make? In the technology?...

**STAKEHOLDERS**

**Now that you have thought hard about all stakeholders, what improvements would you like to make? List them...**

If you think about all stakeholders of this technology. If you think about stakeholders that are less obvious. If you think about the way certain stakeholders are affected by this technology and if you want to take them into consideration. If you think about all that, what would you (want to) improve? In the technology? In context? In use?...

**DATA**

**Now that you have thought hard about the impact of data on this technology, what improvements would you...**

If you think about the limitations of data. Things like subjectivity, incomplete datasets and so on. If you think about the way new insights are handled. If you think about the sustainability of the collection of data or the data that is collected from the users. If you think about all that, what would you (want to) improve? In the technology? In context?...

**INCLUSIVITY**

**Now that you have thought hard about the inclusivity of the technology, what improvements would you like to...**

If you think about accessibility to this technology. If you think about built in biases or automatic decisions that may be biased. If you think about who is benefitting from this technology and the diversity of the team that creates the technology. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**TRANSPARENCY**

**Now that you have thought hard about the transparency of this technology, what improvements would you like t...**

If you think about the communication on the way the technology works and the businessmodel. If you think about the explanation on automatic decisions that are made. If you think about complaint procedures and transparency on possible negative effects. If you think about all that, what would you (want to) improve? In the technology? In context?...

**SUSTAINABILITY**

**Now that you have thought hard about the sustainability of this technology, what improvements would you like t...**

If you think about the direct and indirect energy use and the materials that are used in the technology. If you think about the lifespan of the technology and the hidden environmental impact of the technology. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**FUTURE**

**Impact Improvement: Now that you have thought hard about the future impact of the technology, what...**

If you think about an utopian and a dystopian scenario. If you think about the way this technology can change the world. If you think about the consequences of a different party buying your technology. If you think about all that, what would you (want to) improve? In the technology? In context? In use? ...
